

5G Wireless Signs With Crofos Networks to Supply Wi-Fi Solutions in Select Asian Markets

Wednesday June 7, 9:00 am ET

Relationship Fosters the Development of Broadband Wireless Access for Multiple Business and Residential Communities in South Korea, Bangladesh and Kazakhstan

MARINA DEL REY, CA--(MARKET WIRE)--Jun 7, 2006 -- 5G Wireless Communications, Inc. (OTC BB:[FGWI.OB - News](#)), a leader in the wireless broadband industry, today announced it has signed an Authorized Channel Partner agreement with Crofos Networks Co., Ltd., a pioneer in providing complete IT and broadband solutions in the Asian market. 5G Wireless, through this strategic endeavor, will be providing its new "cellular-style" wireless base stations and high performance microcells to a wide variety of commercial and residential clients in the key areas of South Korea, Bangladesh and Kazakhstan.

The new VAR (Value Added Reseller) arrangement allows 5G to establish presence and pursue market share in these emerging markets. 5G Wireless products and access point/RF hardware are currently under product testing and deployment at the Crofos facility in South Korea.

"Gaining entry into the South Korean market is just the first of many intended 5G endeavors in Asia," says Benjamin Di Lello, Senior Vice President of Sales and Marketing for 5G Wireless. "The country is well-known for its economic growth in the manufacturing and exporting of goods, and most recently for its technological advancements in consumer electronics and more. With the development of the 'new Internet,' (IPv6) initiative, there is a need for a reliable broadband wireless connection now more than ever, and 5G is proud to work with Crofos to offer a solution to multiple communities."

Crofos Networks is a solution provider in both IP-telephony and data network service. The company offers support for ISP/ITSP/CLEC/ILEC, enterprise customers, small and medium business, SOHO, and residential users. Crofos' offerings are targeted at a full range of IP-Telephony and Data services and strive to offer profitable bundles of data, voice and multi-media services such as Internet access, voice services, networked applications, managed networks, branch office internetworking, multimedia entertainment solutions, and more.

"We are excited to be working with 5G Wireless to bring complete broadband wireless solutions to Asia," says Mr. YM Kim, President of Crofos Networks Co., Ltd. "Our commitment to customer satisfaction and reliable, stable services coupled with 5G's expertise in Wi-Fi design and infrastructure will promote and facilitate improved network environments for enterprise customers, residents and more."

About 5G Wireless Communications, Inc.

5G Wireless Communications, Inc. is a wireless systems infrastructure company with technology that is based upon innovative signal processing and antenna design. This network architecture is based on standard IEEE 802.11b/g Wi-Fi equipment. The 5G Wi-Fi Hotzones(TM) function through macro-cell base stations deployed from tall towers and the tops of tall buildings, while dead spots are filled in with smaller micro-cells following the proven deployment strategy used today by the cellular carriers. This type of structural design allows for a well-tailored combination of cells resulting in the ability to add higher capacity where and when needed. 5G Wireless Base Stations have the advantage of multiple usage and varying functionalities for both the private and public sectors, including governance and administration for government departments, security and intelligence purposes, and educational uses, as well as for the management of data by businesses and companies. The company is located in Marina del Rey, CA. For additional information call 800.916.1611 or visit <http://5gwireless.com/>.
