

5G Wireless Receives an Initial Purchase Order of \$720,000 From Ivado to Begin Wireless Deployment

Tuesday June 13, 9:00 am ET

Recently Announced Exclusive Provider of Wi-Fi Hardware for IVADO; 5G Moves Forward With Wi-Fi Base Station Implementation for IVADO's Hospitality Market

MARINA DEL REY, CA--(MARKET WIRE)--Jun 13, 2006 -- 5G Wireless Communications, Inc. (OTC BB:[FGWI.OB](#) - [News](#)), a leader in the wireless broadband industry, today announced it has obtained the opening purchase order of Wi-Fi base stations totaling \$720,000 from IVADO, a source of broadband Internet and telephone communications solutions for the corporate community and hospitality industry.

The initial purchase order for 5G's indoor G-Force 850 indoor microcell products will be used to provide broadband access to 6,000 time share units in North America and is the first in a series of orders to fulfill a 22,000 unit contract already secured by IVADO. Additional orders will follow as IVADO executes its wireless deployment plans for the contracted facilities.

"We are working with 5G to deploy wireless access points in various resort, hospitality and campus networks because we are confident they can provide the technology, engineering expertise and support for our real-world environments," says Joshua Henschell, President of IVADO. "The initial purchase order with 5G is just the first step in delivering Wi-Fi solutions to our clients."

IVADO is a provider of broadband Internet and telecommunication services. The company prides itself on offering clients premier Internet and telephone communication services through the delivery of high-speed wireless broadband, DSL and unlimited local and long distance calling plans at rates that are significantly below the package offered by traditional cable and telephone providers. IVADO focuses on the superior speed, customer support and reliability of services at prices that can fit nearly any budget.

"The forging of this agreement with IVADO is a key element in our overall strategy of becoming a leader in WiFi deployments in the time-share hospitality market," says Jerry Dix, CEO of 5G Wireless. "We've demonstrated through dynamic field trials conducted by IVADO the consistency and reliability of our hardware. Now we will jointly focus on execution of the deployment plan."

About 5G Wireless Communications, Inc.

5G Wireless Communications, Inc. is a wireless systems infrastructure company with technology that is based upon innovative signal processing and antenna design. This network architecture is based on standard IEEE 802.11b/g Wi-Fi equipment. The 5G Wi-Fi Hotzones(TM) function through macro-cell base stations deployed from tall towers and the tops of tall buildings, while dead spots are filled in with smaller micro cells following the proven deployment strategy used today by the cellular carriers. This type of structural design allows for a well-tailored combination of cells resulting in the ability to add higher capacity where and when needed. 5G Wireless Base Stations have the advantage of multiple usage and varying functionalities for both the private and public sectors, including governance and administration for government departments, security and intelligence purposes, and educational uses, as well as for the management of data by businesses and companies. The company is located in Marina del Rey, CA. For additional information call 800.916.1611 or visit <http://5gwireless.com/>.
